UPBEAT START FOR NEW YEAR

FUN in the Sun Time; Again

The Market in Depth

1991 may not be off to a 'roaring start', but at least it does seem to be off to a *healthy* one. After some of the bad news of 1990, that is *very good* news indeed. The overall market looks steady, and that in itself is *mighty good news* to dealers who felt whiplashed by the volatility of 1990. In fact, the market has been basically steady for almost two months, and every indication is for continued calm.

There is, to be sure, a healthy mix of plus and minus signs in this issue. We always expect some small adjustments in Bid, and they should come as no surprise to our readers either; we think that it is one more sign of a robust marketplace. The most important aspect to this phase of the market is not whether 'this coin' or 'that coin' is up or down; far more important is the answer to the misleadingly simple question, "Is there activity?" Do we have buyers and sellers jockeying for position? In a nutshell, do we have coins trading hands, and especially, trading hands at reasonable levels? As long as we have buyers and sellers agreeing on prices, with real money circulating, we will continue to have a viable coin market.

Another positive sign is that the Bidding activity is taking place *now*. With so many dealers on vacation, or even travelling to the FUN Show (starting after the New Year in Florida), it is perhaps a touch miraculous that we have as much business going on as we do. Speaking of the FUN Show, we are actually starting to hear dealers announce *very* positive expectations for the show – this is a far cry from their attitudes of only a few weeks ago.

What will dealers find in 1991? We aren't in the prediction business, but we will note that we are hearing more dealers than ever fondly referring to their want lists. Many dealers are *not* 'advertising' these high 'Want List' Bids (whether on behalf of themselves or customers); they feel that to do so would be unwise in periods of volatility. By keeping their demand quiet, they can exert maximum leverage on the willing seller. If the market continues steady, however, we expect to see more of these Want Lists broadcast as procuring the coin will take precedence over 'saving the last dollar'. It also seems that 'old-fashioned' looking at the merchandise before negotiating on price is also coming back into vogue. Perhaps 1991 will be remembered as a year when dealers rediscover some of the ways business was done in 1981.

This Week's Market

CENTS THRU HALVES: The last couple of weeks have found the BU roll market seemingly in hibernation. There are very few changes in this issue due to the lack of active Bidding. Of course, this should be expected at this time of the year.

DOLLARS: Dealers are getting very excited about the Dollar market. There are numerous Bidders vying for nearly every issue in MS-63 and higher which may be somewhat reasonably priced. The MS-64 & 65 columns are covered with plus signs as want lists are appearing in anticipation of an active FUN Show.

PROOF SETS AND MINT SETS: Even though the holidays are over, Proof Sets and Mint Sets are holding steady. Several buyers are still looking for most of the issues at current levels. The only declines appear in the Mint Set chart – for just a few issues.

COMMEMORATIVES: The Silver Commem market is beginning the year on a very positive note. There are a whole slew of plus signs throughout the chart as dealers try to stock up at what they feel are very reasonable levels. Even the issues which do not display plus signs are mostly in demand at today's levels. The Gold Commems are even showing signs of stability at current Bids.

TYPE: Although the Type charts are not filled with a countless number of plus signs, the market here is still quite healthy. Marketmakers are attempting to fill want lists before they attend the FUN Show where they feel that Ask prices will be just that much higher. Dealers currently loaded with inventory are certain that it will be a seller's market.

GOLD: U.S. Gold remains relatively steady with several plus signs scattered across the chart. This area of the market actually began this latest run-up about eight weeks ago (in the second week of November). Now every series seems to be participating.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$399/$414, 1987 1oz-$405/$425, 1/2oz-$200/$218, 1988 1oz-$470/$530, 1/2oz-$200/$220, 1989 1oz-$475/$535, 1/2oz-$200/$230, 1990 1oz-$550/$610, 1/2oz-$285/$340. Proof Silver Eagles are trading at: 1986-$14/$16, 1987-$16.50/$19, 1988-$76/$82, 1989-$16/$17.50, 1990-$23.75/$25.50 BU 1986 Silver Eagles wholesale at $10/$11.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc.,may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65s are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

MARKET PSYCHOLOGY IS POSITIVE

Retail Buyers Active

The Market in Depth

Dealers who packed up their wares and headed to Florida for the FUN Show with a positive attitude were not disappointed. By the end of the show, more than one dealer was heard to exclaim that he thought it was one of the best shows in the last five years!

Was it really that good? It was, although not for all the reasons that might be expected. The key seems to be the steady market now taking place, as opposed to the rising markets that dealers expect to fuel a successful show. Perhaps the steady nature of the influx of retail customers to the Bourse floor, combined with the calm nature of most of the many transactions that were occurring, added to this sense of 'comfort'. Perhaps it is as simple as the fact that buyers view the current price levels as reasonable, and are more than willing to buy coins that they like at these levels. After all, there is nothing quite like the belief in 'value' to entice buyers.

In a real sense, the 'lack of intensity' at FUN really was a blessing in disguise. Shows that start with a 'Bang' but slow to a crawl at the end leave dealers feeling that the market has lowered. Shows that start slowly and build give a better feeling at the end, but frantic trading at the end can result in less than optimal purchasing. This FUN Show, which was active throughout at relatively stable price levels, gave dealers the feeling that the market has a stable foundation on which this new demand will result in a building stage. The fact that this positive market psychology has become prevalent was best indicated as there seemed to be no dealers at FUN selling coins at discounted levels. Nothing like some fresh money entering the market to raise sell levels 5% to 20%. And nothing like having customers which resulted in even the wholesalers doing some retail transactions. It was fun.

The positive psychology was also seen at Mid-American Rare Coin Auctions' 1991 F.U.N. Sale. With total prices realized reported over $1.6 million, the sale continued the string of auction successes at FUN. Highlights included:

Denomination	Cataloguer's Grade	Price Realized
1857 FE Cent	Gem Unc66	$3960
1858-S Seated Dime	Select Unc64	$3520
1871-S Seated Quarter	Select Unc64	$3410
1917-S Standing Lib 25c	Superb Unc67	$9350
1921 Alabama	Gem Unc66	$6050
1857-C Half Eagle	Unc61	$5500
1854-S $20	Unc63	$4620

This Week's Market

CENTS THRU HALVES: There appears to be an increase of Bidding activity in the BU roll market this past week, however, it is not apparent through higher Bids. Most needs are generally monitored at the current levels.

DOLLARS: As was evidenced at the FUN Show, the Dollar series is highly active as numerous dealers are in the hunt for whatever material comes onto the marketplace. Common issues in MS-63 and higher were easy sellers at current levels and better dates seemed to bring at least 5% over previous Bids. Several dealers were raising their buy prices in an effort to fill their needs.

PROOF SETS AND MINT SETS: A few of the early Proof Sets (Franklin) are lower this week, yet the later clad sets remain steady at current Bid levels. Mint Sets are still in demand by several buyers at today's levels.

COMMEMORATIVES: Many dealers remarked at the FUN Show that the Commem (Silver) market was "fun" again. In checking with numerous dealers at the show, this was one area that seemed to be selling to the public rather easily. As you can see from the number of plus signs in this week's chart, dealers are making an honest effort to stock up on specific issues before they move too far above the recent lows.

TYPE: Although the charts do not reveal a multitude of Bid increases, the Type market was very active at today's levels. The only difference here is that most dealers are not making their Bid prices readily available like they are in the Dollar and Commem series. Rather than Bidding specific coins up, they are buying coins from sellers at the seller's asking prices (within limits).

GOLD: While the gold market is higher this week than it was last week, the smaller circulated issues seem to be losing some of their premiums. Nonetheless, the larger denominations are doing well, as are most Mint State issues. Even the majority of MS issues with no plus signs in the chart are in demand at today's Bid levels.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$407/$420, 1987 1oz-$412/$428, 1/2oz-$209/$218, 1988 1oz-$490/$535, 1/2oz-$208/$238, 1989 1oz-$490/$535, 1/2oz-$212/$235, 1990 1oz-$600/$645, 1/2oz-$310/$360. Proof Silver Eagles are trading at: 1986-$14/$18, 1987-$15.50/$19, 1988-$82/$88, 1989-$15/$18, 1990-$20/$26. BU 1986 Silver Eagles wholesale at $10.25/$11.25.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc.,may not have full mint lustre, may be dull, toned, or spotted May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field only minor marks on main devices Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

[illegible] UNCIRCULATED: Strictly [illegible] [illegible] However [illegible] will be bag marked [illegible]

MS-63 (CHOICE UNCIRCULATED): Will have [illegible] bag marks, may show only a slight weakness [illegible] strike. [illegible] have full lustre. These are well above average [illegible].

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for 'typical' coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

PLUS SIGNS CONTINUE CLIMB

Shows & Auctions To Hit California

The Market in Depth

The coin market is continuing to display the same Holiday Cheer that started around Thanksgiving. If this display of strength can continue past Valentine's Day, there's no telling how many collectors may fall in love with coins again. More than one dealer has noted the coincidence of this rally with the Holiday season, and one of the bourse 'jokes' at F.U.N. was the New Year's wish that volatility would take a Holiday—a permanent one.

In the meantime, buyers and sellers, dealers and customers, all seem to be enjoying the activity that the recent market stability and continued slow growth has brought. The Long Beach Coin, Stamp, and Baseball Card Exposition will be coming early in February, and that show will provide the second major test of this market's strength. If the market demonstrates as much resilience as it did at F.U.N., some dealers are predicting a major rally may follow. Others sincerely feel that the market is not quite ready for a sustained rally, and point to cash flow as one of the problems that could radically affect the market's ability to absorb a major influx of material. The degree to which events in the Gulf will impact the coin market is also one of the current hot topics of debate among dealers (as it seems to be among the general population as well).

Auctions are going to continue to play a major role in current market pricing as additional material enters the market. Auctions by Bowers and Merena will be presenting the Greenwich Collection on January 24-25, in conjunction with the Golden State Coin Convention in Pasadena. The auction contains an impressive offering of U.S. Gold coins, with many early rarities. 1804 $2 ½ in AU55, an 1804 $5 in MS64, a 1796 $10 in AU-55, and an 1851 $20 in MS61 are among the pieces of special interest. The sale is also strong in several other series, notably commemorative gold.

Superior Galleries will follow with their February 3-5 Sale, featuring the Dennis Mendelson Collection of Large Cents. Superior has developed quite a following among collectors of these two favorite specialty series—Large Cents and Bust Halves. Collectors of these items tend to be, well, dedicated, and attendance and enthusiasm at their sessions tends to run at a high level. Its hard to argue with enthusiasm, and we sometimes wish we would see a little more among collectors of some other series. The sale also features an astonishing collection of California National Currency, enough Rare Date and Proof Gold coins to keep 'big-ticket' collectors happy for a year, and enough Commemorative and Territorial Gold to fill out a few collections.

This Week's Market

CENTS THRU HALVES: Bid levels for the majority of the BU roll market remain stable even though activity appears to be melancholy at best. There are very few sellers willing to give up inventory at today's levels. Most dealers who have sizable inventories of rolls are capable of waiting for the higher buyer to come along.
DOLLARS: Dollars continue to lead a list of needs which most every dealer seems to be compiling from his or her clients. The generic issues (MS-63, 64, & 65) remain steady at current levels with large quantities in demand. What may be more interesting is the fact that the better issues appear to be very strong at the new higher Bids. In most cases, the increases are slight as market leaders are being very careful (in light of last year's leap-frog run-up which inevitably destroyed the market for a period of time) as they try to buy coins, but not just raise a market needlessly.
PROOF SETS AND MINT SETS: Several dealers feel that this area of the market would have begun to sell-off by now, however, Proof and Mint Sets are still maintaining their recent Bids. There is no telling how long this will last, but those with major positions are happy with the current market.
COMMEMORATIVES: The Silver Commem market is very active at today's levels even though there is not a massive number of plus signs in evidence. It seems like most buyers are trying to stay within a certain set of parameters while still purchasing coins. Some dealers have reported that they feel if this market moves up too quickly, then customers will not be able to take advantage of the recent low levels.
TYPE: Bidding activity has become stronger in the Type market over the last couple of weeks. Dealers are trying to fill want lists for their customers, and as a result, Bid levels are moving higher. Mint State issues seem to be more in demand than Proof; although, Silver issues are just as strong in both categories.
GOLD: This is the largest number of plus signs in the Gold chart in a long while. There is strong across-the-board demand and very few sellers at the current Bids. Most sellers are waiting for even higher levels before they let loose of their "holdings".
EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$417/$430, 1987 1oz-$419/$440, 1/2oz-$212/$225, 1988 1oz-$480/$530, 1/2oz-$212/$240, 1989 1oz-$490/$535, 1/2oz-$215/$240, 1990 1oz-$595/$650, 1/2oz-$310/$360. Proof Silver Eagles are trading at: 1986-$15/$18, 1987-$16.50/$19, 1988-$78/$86, 1989-$16.50/$18.50, 1990-$23/$26. BU 1986 Silver Eagles wholesale at $10.35/$11.25.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY.

MS-60 UNCIRCULATED: Strictly Uncirculated [illegible] However [illegible] necessary. It will be bag [illegible] may [illegible]

MS-63 CHOICE UNCIRCULATED: Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well [illegible] coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

Our 29th year...

STEADY MARKET SEES SELECTED AREAS RISING

Bidding Activity Increases Despite War

The Market in Depth

This week's overall coin market is steady to higher, with emphasis on the steady. Activity is reported as healthy and perhaps even improving, and dealers don't seem too overly anxious to push the Bids up rapidly. Considering that this was a week that found most people glued to their TV News, the fact that there are any plus signs at all would seem to be a tribute to the strength of this still-young rally. The Gulf War, for all of the dire predictions of negative economic impact, seems to have had relatively minor reverberations on the markets – and most of those were positive. A strong argument could be made that it has had no impact on rare coins directly, although the drop in bullion certainly jolted some related Bids.

Not all of the series are currently enjoying the same upward pressure on Bids, but it still seems that this is a broad-based advance. If the steady climb in Bids continues, dealers are hoping that the benefits of the rising markets will be spread more evenly among the dealer community. There are many who are still waiting for the influx of new money. Perhaps that will come if this turns into a market-wide rally.

Activity also looked healthy on the Auction front, with Stack's reporting very enthusiastic Bidding at their January 16-17 Sale. A large crowd was in attendance, with keen competition among the many who were Bidding; the negative to an enthusiastic floor is that the 884-lot session took 7 hours to gavel.

The Auction was another installment of the Collection of "A Prominent Numismatist", and many of the coins had been off the market for decades. Such choice material seems to generate greater enthusiasm. None of the lots had been certified, so the results certainly indicate that quality coins still know how to speak for themselves. Included among the highlights were:

Date	Cataloguer's Grade	Price Realized
1835 Half-Dime	Ch BU	$22,550
1839 Dime	Gem BU	$25,300

This Week's Market

CENTS THRU HALVES: The BU roll market continues to lag behind the rest of the marketplace. Activity is sparse, although the limited action found is usually at current Bid levels.

DOLLARS: Dealers remain very persistent in their quest for additional Dollars to fill out want lists. Nearly every issue in MS-63, 64 and 65 (even higher grades) is in demand at today's Bids. Whether collectors are trying to fill out their sets or just trying to buy issues which they feel were underpriced, it all adds up to the same conclusion – this series is very much in demand.

PROOF SETS AND MINT SETS: A few of the silver Proof Sets (1961-63) are down this week, however, the rest of the chart indicates that Bid levels are firm. Most Mint Sets remain active at current levels.

COMMEMORATIVES: Silver Commems are very sound at today's Bid levels. There may not be a lot of plus signs, but almost every issue has support as dealers do not want to be left behind as this market rises. This is one area of the entire numismatic arena where even when there is a decline, collectors are usually involved as they try to fill-in, or upgrade their sets. So, when the market is as robust as it is at this time, it is even more difficult to pry properly graded coins away from potential sellers.

TYPE: Type appears to be quite healthy. The majority of changes this week are advances rather than declines. Mint State issues are more active than Proof, but this is not to be taken as a negative toward the Proof issues. Overall, this area is rebounding very well.

GOLD: This week's Gold chart has a healthy mix of plus and minus signs. The Mint State issues have had a relentless number of increases over the last couple of months, so it should not be unexpected that some issues would decline. Circulated issues (10s & 20s) are strictly a function of gold bullion falling so much this past week. The declines for smaller denomination coins are a simple result of more supply than demand.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$400/$415, 1987 1oz-$402/$420, 1/2oz-$202/$211, 1988 1oz-$490/$530, 1/2oz-$200/$230, 1989 1oz-$490/$530, 1/2oz-$210/$228, 1990 1oz-$600/$645, 1/2oz-$330/$370. Proof Silver Eagles are trading at: 1986-$15.50/$19, 1987-$16.75/$20, 1988-$80/$88, 1989-$16.25/$19, 1990-$23.50/$28. BU 1986 Silver Eagles wholesale at $10.35/$11.50.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 · Unc.,may not have full mint lustre may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage

MS-63 Choice BU · Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 · Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65 Few contact marks in field, only minor marks on main devices. Full strike with eye appeal. Attractive toning permissible.

MS-65 · Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-63 (CHOICE UNCIRCULATED) Will have [illegible] marks [illegible] a slight weakness [illegible] full lustre. These are well [illegible] average [illegible]

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65s are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for 'typical' coins. These usually average MS-63, but may also include some MS-64 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

COINS CONTINUE CLIMB

Superior Auction Spotlights Upcoming Week

The Market in Depth

Southern California, long-referred to as the "Southland", hosts an extraordinary numismatic 'event' this time every year – or events, to be more precise. The 'Southland Season' lasts two-to-three weeks, and contains opportunities for every collector of every series to expend every dollar they have available. And have fun while doing it.

The Golden State Coin Convention, held last week in Pasadena, is usually the kick-off event. Bourse activity here is a nice counterpoint to the hyper-activity and size of Long Beach, providing dealers and collectors with an opportunity for a more relaxed examination of the material. Auctions by Bowers & Merena presented their second Golden State Auction; "Spirited Bidding" was reported. Highlights included:

Denomination	Cataloguer's Grade	Price Realized
1918/7-D Buffalo	MS60	$11,000
1818 Bust 25c	PCGS64	$11,000
1859 $1	NGC64	$10,175
1872-CC $1	MS61, PL	$12,100
1878 Gold $1	NGC-Pr64	$10,450
1898 $10 Gold	PCGS-Pr63	$13,750
1873 $20 Open 3	PCGS64	$35,200

The next major event of the Southland Season will be Superiors' February 3,4,5, Sale featuring the Dennis Mendelson Collection of Large Cents. The Sale starts with two specialized collections. A world class offering of California National Bank Notes, including many Gold Bank Notes, will be sure to attract those dedicated pursuers of these rare items. And enough cannot be said about the dedication of Large Cent collectors. The 400 lots of the Mendelson Collection includes the rarities and Condition Census material that you would expect from a major offering, and that is followed by another 350 pieces from other consignors. You just know that the Bidding is going to be enthusiastic. If the rest of numismatics had the same spirit as these collectors of Early American Copper, the CDN would probably have to lay in a fresh supply of plus signs.As spectacular as these early sessions will be, the final offering of Gold would qualify as a major numismatic event all by itself.

The Southland Season will end with The Long Beach Coin Stamp & Baseball Card Show. This has become an institution as important as Baseball and Apple Pie to the American Way of Coin Collecting. What other numismatic event has collectors going into training two weeks before to make sure their endurance is up to the test?

This Week's Market

CENTS THRU HALVES: The BU roll market is receiving mixed signals this week as both plus and minus signs can be spotted in the charts. Weakness is being seen in the Roosevelt Dime series, while strength is found in Washington Quarters. In addition, Franklin rolls are steady at current Bid levels.

DOLLARS: The Dollar series is the most consistently Bid area of numismatics today. This has been the case now for several weeks; while several other areas have also been actively Bid, Dollars have had the most intensity. This solid activity continues as plus signs are scattered all over the charts (MS-64 & 65). The plus signs are not the only story, for the issues which are not climbing to higher levels are also in demand at current levels.

PROOF SETS AND MINT SETS: The majority of Proof Sets are stable at today's levels with dealers seeking many issues at these Bids. Mint Set prices are steady, yet, not quite as actively sought as are Proof Sets.

COMMEMORATIVES: Silver Commemoratives do not display nearly as many plus signs as can be found in the Dollar charts, however, comparable strength in Bidding activity is being reported at the current Bid levels. This series has a long ways to go before it regains the price stature it displayed before last year's major downturn.

TYPE: The Type market remains one of the areas in which dealers seem to have a difficult time in locating coins for their customers. As a result, dealers persistently increase their buy prices in attempts to be ahead of the "pack" in trying to buy whatever issues may become available on the marketplace. The higher Bids may not attract a substantial amount of coins to them, but it will attract the attention of the potential seller as to who is really serious about buying coins.

GOLD: The U.S. Gold chart has not changed dramatically this week, however, the good news is that most of the Bids are steady. Just a couple of issues have dropped due to discounted sells, while the majority of coins remain status quo.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$401/$413, 1987 1oz-$405/$421, 1/2oz-$202/$220, 1988 1oz-$490/$530, 1/2oz-$200/$230, 1989 1oz-$490/$530, 1/2oz-$220/$235, 1990 1oz-$600/$645, 1/2oz-$340/$375. Proof Silver Eagles are trading at: 1986-$15/$19, 1987-$16.50/$20, 1988-$80/$90, 1989-$16/$19, 1990-$24/$27.50. BU 1986 Silver Eagles wholesale at $11.25/$11.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin merket, monitoring all possible transactions end offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT UNSEEN** market, such bids mey include consideration of all costs attendant to certification for e particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just beceuse a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Deeler transactions; es en investor you may buy end sell coins through a dealer for a fee

THE GREYSHEET

Numbers are used as shorthand for adjectival grading The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc.,may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage

MS-63 Choice BU - Brilliant Unc (may exhibit some toning but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike Above average coins

MS-64 - **Distinct BU** -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices Full strike, with eye-appeal Attractive toning permissible.

MS-65 - **Gem BU** -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63, but may also include some MS-64 and MS-65. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU rolls are for typical original rolls of each date and mint mark

LONG BEACH PACKS 'EM IN

Bid Jumps Leave 'Em Breathless

The Market in Depth

The 'Southland Season' is ending with America's dealers coming together for their annual Rites of Late-Winter at the Long Beach Coin, Stamp & Baseball Card Show.

Dealers attending Superior Galleries' February 3, 4, 5, 1991 sale featuring the Dennis Mendelson Collection of Large Cents reported both an impressive turnout and enthusiastic floor action. Activity on coins under $3,000 was especially pronounced, and more than one dealer was heard voicing complaints at the premiums over Bid that had to be paid in order to win the lot. The demand for the super-premium coins is still spotty, with strong possibilities for a winning Bid for that rare, low-pop item at prices substantially lower than a year ago.

Lovers of Early American Copper whetted their appetites on some colonials, with a rare 1785 Confederatio Pattern bringing $8,800 and a 1786 New Jersey Narrow Shield realizing $3,520. Still, everyone knew that the **Main Course** was the following Large Cents. As expected, bidding on the Large Cents was exceptional—if possible, it may have been even more enthusiastic than predicted. Among the highlights:

Denomination	Cataloguer's Grade	Price Realized
1793 Large Cent, S-10	MS60+	$34,100
1794 Large Cent, S-26	MS60+	$35,750
1794 Large Cent, S-52	F-15	$7,425
1822 Large Cent, N-13	F-12	$4,180
1826/5 Large Cent, N-8	MS60	$4,180
1830 Large Cent, N-9	G-5	$7,425
1839/6 Large Cent, N-1	VF-25	$3,960
1840 Large Cent, N-8	MS67	$9,350
1841 Large Cent, N-1	Pr60	$6,875
1856 Large Cent, N-5	Pr63B	$3,520

With all of the good news in the coin market of late, we are still hearing complaints from many dealers that they are not participating in the 'new prosperity'. The complaints aren't coming from any particular region of the country, nor from any particular type of operation. During Long Beach, we will have the opportunity to talk to hundreds of dealers, and we will bring you their latest opinions of what is happening in the market.

This Week's Market

CENTS THRU HALVES: BU Lincoln Cent and Franklin Half rolls have received some active Bidding this past week; the majority of Bids are at current levels. Mercury and Roosevelt Dimes and Washington Quarters are not faring as well. Several minus signs can be found in these columns as sellers dominate.

DOLLARS: For all the "Dollar Fanciers", this should be a happy time as demand continues to increase for the MS-63, 64 & 65 issues; and bids are exceptionally higher for better dates in MS-64 & 65. For those dealers and their clients who held on when Bids were faltering, they are beginning to see some much needed inspirational progress.

PROOF SETS AND MINT SETS: Early Proof Sets (1940-1952) are losing some of their glitter, yet, the later sets remain active at current Bid levels, with some even higher this week. Mint Sets are mostly steady with only one lower (1964).

COMMEMORATIVES: The Silver Commem market looks like it has been bombarded with plus signs. Most of the MS-64 & 65 issues are wanted at higher levels; where plus signs do not appear, buyers are anxious at last week's levels. Unlike the Dollar market where Bid jumps are substantial, Commems are increasing nominally.

TYPE: The Type market remains very active with lots of plus signs and very few minus signs. Copper seems to be on many dealers' want lists as the Superior Sale confirms.

GOLD: The Gold chart is something to behold. Mint State Gold is very active as many issues are in demand—numerous at higher levels. Even the issues which are lower this week, are still in strong demand at the new levels.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$393/$405, 1987 1oz-$397/$410, 1/2oz-$205/$215, 1988 1oz-$480/$500, 1/2oz-$205/$230, 1989 1oz-$465/$530, 1/2oz-$220/$240, 1990 1oz-$605/$640, 1/2oz-$345/$380. Proof Silver Eagles are trading at: 1986-$16.25/$18, 1987-$17/$18.50, 1988-$78/$83, 1989-$16.50/$17.50, 1990-$24/$27. BU 1986 Silver Eagles wholesale at $11.05/$11.50.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee

THE GREYSHEET

Numbers are used as shorthand for adjectival grading The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc.,may not have full mint lustre, may be dull, toned, or spotted May be the worst possible example, but shows no wear or damage

MS-63 - Choice BU - Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike Above average coins

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY.

MS-60 [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average [illegible].

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

PLUS SIGNS CONTINUE ACROSS CHARTS

Trading in this Market is Selective

The Market in Depth

Dealers were generally pleased with the Long Beach show, although the most enthusiastic comments were heard from dealers who came to buy. One of the advantages of a major show is that the buying dealer has an incredible array of rare coins from which to choose. There was certainly lots of activity at Long Beach, and dealers generally reported a "good" show (and a few reported a "**very good**" show). Some dealers are still unhappy with the *level* of transactions – that is, the ***frequency*** of trades. Dealers have accepted the current price levels, for better or worse, as the fact of life that they are. With the rise in Bids since late November, a low-level of enthusiasm has permeated the market, and dealers have set aside memories of original cost in favor of the concept of *replacement cost*. All this has made it easier for trades to occur.

The current coin market, or perhaps better said, the current *strategy of dealers* in the marketplace, is to maintain their equilibrium. That is, most dealers have achieved the balance that they want between cash and coins; their inventories have been reduced to more manageable levels, and contain the coins that they want to stock. When a dealer decides to add to inventory, you can be sure that he will select a coin that he really wants at a price that is agreeable – otherwise, no sale.

On the subject of plus signs, while the Bid price on many issues is continuing to climb, dealers are still not *overly* enthusiastic. Yes, the value of their inventory is rising (always a happy event in an inventory-dominated business), but trading activity is still at levels substantially lower than during the Bull market. In many cases, the owner of a coin with a rising Bid will also raise his Ask price, with the result that the coin stays in stock until a really anxious buyer emerges. On the other hand, the dealer who wishes to sell such a coin can approach the high bidder or wait for the Bid to approach his Ask. The 'theoretical' value of the coin may be rising, but there is still a good chance that you will have to really work to make the sale, and the coin just may continue to appreciate while it sits in inventory. Another strong reason to make sure that you really like the coin when you buy it.

This Week's Market

CENTS THRU HALVES: The BU roll market remains about the same as it was last week. Mercury and Roosevelt Dimes are lower with a few sporadic minuses in other series. Some BU Lincoln rolls are higher with several other rolls in demand at current levels. Most Franklin rolls are wanted at today's Bid levels.
DOLLARS: The plus signs may not be as plentiful this week as they have been in recent weeks, but there are still many dealers looking for most dates in MS-63, 64, & 65. At Long Beach, it seemed like more sales could have been completed if the sellers had been willing to meet the buyer"s "new" higher Bids. However, as is usually the case when certain areas gather steam, the potential sellers raised their Asking prices proportionately to the buyer's new Bids.
PROOF SETS AND MINT SETS: There is a healthy mix of plus and minus signs in these two charts as dealers try to balance their inventories. Furthermore, the majority of issues which did not change this week are still in demand at current levels.
COMMEMORATIVES: This is one area which may have had the most activity this past week, yet, the number of increases does not reveal this fact. Most dealers reported that they did a lot of business at the Long Beach Show within the current levels.
TYPE: The Type market continues very active with a respectable balance of pluses and minuses (more pluses than minuses). It seems like the more Bids rise, the more Asks rise also. The ultra-rare coins seem to be in more pronounced demand these days (known rarities with populations of 1 or 2), however, until recently, most potential buyers would rather listen to the seller's asking price than make an offer. This looks like it is about to change as substantially higher Bids are now being monitored for accurately graded coins which fall into this category.
GOLD: The U.S. Gold chart contains very few changes this week as most of the Bidding activity is taking place at current levels. There are a few minus signs which are a result of dealers selling coins at discounts.
EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$392/$404, 1987 1oz-$394/$410, 1/2oz-$205/$215, 1988 1oz-$450/$500, 1/2oz-$200/$230, 1989 1oz-$455/$535, 1/2oz-$220/$240, 1990 1oz-$610/$650, 1/2oz-$345/$380. Proof Silver Eagles are trading at: 1986-$16.25/$18.50, 1987-$17/$19.50, 1988-$80/$86, 1989-$16/$18.50, 1990-$24.50/$27.50. BU 1986 Silver Eagles wholesale at $11/$11.50.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc.-may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example but shows no wear or damage

MS-63 - Choice BU - Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye appeal. Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark–these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices–particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

[illegible]

MS-61 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well [illegible]

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 - but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

PACE OF MARKET RISE SLOWS

Steady to Slightly-Up Still Brings Smiles

The Market in Depth

It has been said that dealers purchase coins for two types of customers: Their paying clients, and themselves. The degree to which a dealer is his own best customer will determine many of the attributes of his business. Will he or she maintain an inventory of sufficient depth and breadth to provide something of interest to anyone walking through the door? Or will the dealer concentrate on Want Lists, so that inventory levels are kept to a minimum and there will be a strong customer for any purchase? Or will the dealer specialize in rarities, knowing that the market is thin, but that sooner or later an anxious buyer will demand that rare item at "any price"?

If you are like the average dealer, you probably do a little of all three. Naturally, everyone likes Want Lists, but there are never quite enough of them to cover the overhead; still, who doesn't want to service willing and eager customers with cash in hand? And dealers are always buying for inventory, whether because a coin is bargain priced, or because a good customer needs to sell. Finally, what dealer hasn't socked away a few super rarities for that proverbial "rainy" day?

This market still seems largely driven by the Want List type of purchasing. Dealers who have their inventories in balance with their ability to carry costs will want to be sure of a customer for any major purchase. With the relative stability (and slow growth) of the market over the past three months, dealers may again start to look for really good buys to add to inventory as their cash-flow allows. In this inventory dominated business, who can resist the "good buy"?

Morgan Dollars provide some good examples of these varying layers of demand. For some time, we have been watching a slow and steady increase in Bid prices across a wide range of issues (especially the better dates) as dealers increased their demand on these issues for inventory purposes. This slow strengthening has been especially apparent in the MS64 and MS65 grades.

This week, the market saw a small number of minuses developing in the MS64 and MS65 columns due to sells, as dealers participated in some "profit taking". Such selling out of inventory has the dual advantage of increasing cash flow and reducing carrying costs, set against the disadvantages of customer service. We have also seen some substantial plus signs in the MS67 column, many of which can be attributed to Want List activity. Balancing the demands is a never-ending task which constantly redefines the market.

This Week's Market

CENTS THRU HALVES: There has been a lot of Bidding activity this past week in the BU roll market. Most dealers who are looking for material are willing to pay current Bid levels. This, of course, does not get reflected with a "plus" or "minus" designation; yet, the activity is encouraging overall. Nonetheless, there are still a few changes which can be seen by the number of plus and minus signs.

DOLLARS: The Dollar market remains the "backbone" of this current rally. Plus signs continue to cover the MS-63, 64, & 65 columns (MS-64 issues do not have as many increases, however, they are quite stable) even though a few minuses have popped up for specific issues. There is a wide range of dealers participating in this area of numismatics which may contribute to this current surge.

PROOF SETS AND MINT SETS: Although the majority of Proof Sets are steady at current levels, there is a preponderance of minus signs over plus signs this week. There is definitely a large supply of some issues which are in excess of demand. Mint Sets are mostly stable at today's Bids.

COMMEMORATIVES: Silver Commems continue to get a lot of attention as dealers increase their Bids by nominal amounts. The slight increases indicate the seriousness of the "buys" without actually trying to "run" them up needlessly.

TYPE: Type coins are very active—at least, Bidding activity is. We cannot actually tell how many coins are trading at these new levels, but we do know that most potential sellers have a tendency to wait too long for higher profits (which sometimes never come). As the saying goes, "You cannot lose money by taking profits".

GOLD: While the Gold market is rather active at today's levels, it seems to many dealers that it is at a crossroads. Will it continue to increase, or, is it headed to lower levels? Some dealers report that it is establishing a new base at current levels and just may "rest" here for awhile before moving up the ladder.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$389/$401, 1987 1oz-$391/$411, 1/2oz-$198/$222, 1988 1oz-$450/$500, 1/2oz-$195/$230, 1989 1oz-$460/$520, 1/2oz-$215/$240, 1990 1oz-$615/$655, 1/2oz-$345/$380. Proof Silver Eagles are trading at: 1986-$15/$18, 1987-$15.50/$19.50, 1988-$77/$86, 1989-$15.50/$18.50, 1990-$25/$27.50. BU 1986 Silver Eagles wholesale at $11.50/$12.00.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 Unc.,may not have full mint lustre, may be dull toned, or spotted May be the worst possible example, but shows no wear or damage

MS-63 Choice BU Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike Above average coins.

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65 Few contact marks in field, only minor marks on main devices Full strike, with eye appeal Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

UNITRADE

IS COMING TO A DEALER NEAR YOU!

Shortly, one of the boldest concepts ever for the collectible industry will be fully unveiled. A single word has been coined to describe this tremendous undertaking...

UNITRADE

The name **UNITRADE** will describe the primary source where you can buy or sell coins (through a **UNITRADE** associate) at current competitive market prices simply by browsing through the largest coin inventory utilizing the latest **computer technology.**

Soon, an initial group of coin dealers located throughout the country, will be provided access to the **UNITRADE state of the art computer network.** This core group of dealers will grow to a national network of thousands by the end of 1992.

These dealers will be able to view **instantaneously**,from a **UNITRADE** provided computer terminal in their offices the current "real time" prices of thousands of coins in the **UNITRADE's multi-million dollar inventory.** These dealers will be able at "the touch of a button" to buy for you any coin listed on this huge inventory.

Also, these dealers will be able to easily and efficiently enter **for you** a coin or coins that you want to sell, and within a matter of minutes a description of that coin and your asking price will be communicated via satellite to hundreds of dealers across the country and will automatically become part of the **UNITRADE** inventory. Thousands of dealers, collectors and investors will have the opportunity to buy your coins.

Although, **UNITRADE's** initial offer is to provide a **huge coin inventory,** this concept will quickly expand to other **collectibles:** baseball cards, stamps, diamonds and gems, etc.

The countdown has begun. In a few short weeks, **UNITRADE associates** will be ready to assist you with your coin needs.

[illegible] Uncirculated [illegible] However [illegible] necessary. It will be bag [illegible] may not have full [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. *Must* have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. *Must* have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

ANA—PNG EARLY SPRING CONVENTION

Coin Dealers to Do Dallas

The Market in Depth

It's time for the American Numismatic Association–Professional Numismatists Guild Early Spring Convention in Dallas; whew, what a mouthful! By the time that you finish pronouncing it, you could be half-way to Dallas. And in fact, most of America's leading coin dealers are doing just that. Trying to telephone a few of our long-time friends for their commentary on the market proved futile, as most had left early for the show. This raised two points. The first is that we are starting to see dealers arriving early at shows again, to participate in the "pre-show" or as it is better known, the "hotel-room bourse" that was so often found at the height of the market. The second point is a little more philosophical.

Most coin collectors and investors that we know really enjoy major coin shows. There is truly electricity in the air at **most large** shows, and the bourse is probably as close as coins will ever get to the floor action of the NYSE. Indeed, coin market participants get a similar sense of being part of a large and active financial market. There is, practically speaking, an unlimited amount of material to inspect. Except for the die-hard specialists whose interests confine them to arcane topics like the large cent varieties of 1843, or Virginia Colonial Currency, there is no way the general collector can inspect even a fraction of the material that dealers are presenting. This is part of what makes the hunt so exciting, and brings the collector back to the next show.

The downside to the show circuit is the cost to the travelling dealers. This may be their business, and they generally must enjoy meeting their customers this way (or they would open a stay-at-home coin shop); still, we have nothing but admiration for those dealers who live out of suitcases in order to bring their material to coin conventions nationwide. Anyone who has travelled extensively for a living will understand: The monotony of hotel rooms, airports at 2 A.M., taxi drivers whose communication skills aren't much better than their driving skills, and putting the kids to bed by telephone; add to that the extra level of problems imposed by security considerations, and the coins that always seem to end up being hand-carried despite the most elaborate shipment plans.

Sure, this is the price that the leading dealers must pay for doing business this way, and sure, they do it for a profit; for all the aggravation and risks attendant, we wish them more than enough profits to make it all worthwhile.

This Week's Market

CENTS THRU HALVES: The BU roll market remains very active this week. Dealers are trying to buy numerous issues (pre-1963) in the Lincoln Cent, Washington Quarter, and Franklin Half series. In most instances, they are attempting to purchase at current levels, but are willing to increase their Bids for specific dates. Nevertheless, several minus signs can be seen in the Roosevelt Dime series with some also found among the other series.

DOLLARS: While the Dollar market continues to be very active this week, especially in MS-63 and higher grades, there are a lot of declines in the MS-65 column as various dealers offer to sell some issues at discounts. Combined with the fact that some dealers have lowered their Bids, it makes for a massive number of changes. DMPL Dollars are on many want lists at noticeably higher levels.

PROOF SETS AND MINT SETS: Proof Sets have an equal number of plus and minus signs this week as inventories are shifting from one dealer to another. Of course, some of the those with minus signs may be a little more difficult to sell. Mint Sets are still steady at today's Bid levels.

COMMEMORATIVES: Gold Commems report a round of minus signs after being somewhat stable over the last few weeks; too many coins available and not enough buyers at the previous levels. Silver Commems remain very active with several issues moving to higher levels. However, there is some discounting going on as the more "populated" coins can be easily located.

TYPE: Plus signs can still be found in the Type charts, but they are not as plentiful as they have been over the past couple of months. In fact, more declines are visible in the charts this week, indicating that some dealers feel various issues are now overpriced.

GOLD: Inventory adjustments are being made and many dealers use the Gold series to increase their cash-flow; there is a more ready market for most Gold issues at higher levels than many other series. The current plunge of gold bullion is not helping this series either.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$384/$397, 1987 1oz-$390/$406, 1/2oz-$195/$220, 1988 1oz-$460/$500, 1/2oz-$195/$230, 1989 1oz-$465/$520, 1/2oz-$210/$240, 1990 1oz-$570/$640, 1/2oz-$340/$380. Proof Silver Eagles are trading at: 1986-$16/$18, 1987-$17/$18.75, 1988-$80/$85, 1989-$16/$17, 1990-$24.75/$27. BU 1986 Silver Eagles wholesale at $11.75/$12.10.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc., may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike with eye appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre 1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-60 [illegible] Strictly Uncirculated [illegible] However [illegible] will be [illegible] may [illegible] have [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. [illegible] have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtuallly clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

MARKET MIXED AT ANA/PNG CONVENTION

Collectors Maintain Status as Number One Buyers

The Market in Depth

We all have a tendency to forget that the collector **is** the backbone of numismatics. We get so caught up in the generic issues (those coins most commonly traded), and the everyday "ups" and "downs" of the marketplace, that we need to be reminded of that occasionally. Without the collector interest in numismatics, the investor market would have buried the hobby this past year. It's the want lists that the collector-oriented dealers bring with them to shows (including the ANA/PNG Early Spring Convention), that keeps a portion of the marketplace churning with activity.

It seems relevant that the majority of wholesale dealers, the ones who trade common pieces of plastic back and forth and have no retail outlet to satisfy, may be finding it difficult to survive these "ups" and "downs" in the marketplace. With spreads so tight (competition so keen), wholesale dealers are expected to survive on 3%-5% markups when selling to other dealers. However, this may be a physical impossibility unless, of course, we had a purely rigid market where they did not have to worry about losses. Since this is not the case, as cycles occur and inventories fall, the pure wholesale dealer is drowning in competition.

One method for long-term survival in this marketplace is the development of a retail base by more dealers across the country, with less reliance on other dealers for their livelihoods. Dealers must develop clients who will buy coins for the long run, and dealers can use this "inventory" when profits are to be made. Coins would disappear from the market, thus creating less supply, as well as increased demand.

This seemed to be the primary theme of the ANA/PNG Convention this past week in Dallas, and the majority of dealers we spoke with felt this was the case. Most wholesale dealers found Bid levels status quo; there was not the hoped-for interest at higher levels, yet, there did not seem to be any "fire" sales either. However, of the many dealers who are positioned for the collector market, we did not find any who complained about sales at the show. There may not have been enough collector coins to buy, but isn't that what makes this the tremendous hobby that it is? If we would just remember that the collector is the one who makes the investor a profit, then the hobby would be a better and more consistent industry.

This Week's Market

CENTS THRU HALVES: Bid changes are moderate this week in the BU roll market. Nonetheless, numerous issues throughout the charts are wanted at the current Bid levels. Most of the action is an effort to fill want lists.

DOLLARS: The Dollar market is mixed as the MS63, 64, & 65 columns show. There seemed to be an awful lot of material in Dallas this past week. Common issues seemed to hold up fairly well, although some of the better dates were being sold at lower levels; especially in MS64 and 65.

PROOF SETS AND MINT SETS: Proof and Mint Sets were adequately steady this past week as buyers and sellers attempted to balance their inventories. There are just a few plus and minus signs in both charts.

COMMEMORATIVES: Silver Commems were quite active this past week, however, most of the trading which took place was at the new lower levels. Potential sellers found that they were not in the best of bargaining positions; if they wanted to move inventory they had to hit the Bidder's **action** , they could not hold out for their Ask levels. Gold Commems are searching for recent lows.

TYPE: Even though the Type chart discloses a vast number of minus signs, the majority of changes were nominal. If you were looking to sell Type coins at the ANA/PNG, you had to be willing to sell to the dealer's Bids; in most cases, they were trying to remain just under previous Bids. If the buyer was too cheap, then the seller was likely to ignore the Bid.

GOLD: The U.S. Gold chart indicates that there is still some softness in this area of the market. Although most issues were good sellers at the ANA/PNG Show, it took a little discounting to entice most of the marketmakers to buy quantities of the more common material.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$393/$408, 1987 1oz-$395/$411, 1/2oz-$196/$206, 1988 1oz-$480/$510, 1/2oz-$194/$224, 1989 1oz-$480/$520, 1/2oz-$210/$245, 1990 1oz-$585/$625, 1/2oz-$345/$385. Proof Silver Eagles are trading at: 1986-$16/$18, 1987-$17/$18.75, 1988-$80/$83, 1989-$15.75/$17, 1990-$25/$27. BU 1986 Silver Eagles wholesale at $11.50/$12.50.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy end sell coins sight-seen The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transections; as an investor you may buy and sell coins through a dealer for a fee

Numbers are used as shorthand for adjectival grading The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 Unc., may not have full mint lustre may be dull, toned or spotted May be the worst possible example but shows no wear or damage

MS-63 Choice BU - Brilliant Unc (may exhibit some toning but it should not be so dark as to hide any problems) will have minor bagmarks and may show weakness of strike Above average coins

MS-64 Distinct BU Far and away nicer than MS-63, yet, a near miss MS-65 Few contact marks in field only minor marks on main devices Full strike, with eye appeal Attractive toning permissible.

MS-65 - Gem BU -Sharp, full strike NO major distractions in field or on main devices Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

UNITRADE INC

IS COMING TO A DEALER NEAR YOU!

Shortly, one of the boldest concepts ever for the collectible industry will be fully unveiled. A single word has been coined to describe this tremendous undertaking...

UNITRADE

The name **UNITRADE** will describe the primary source where you can buy or sell coins (through a **UNITRADE** associate) at current competitive market prices simply by browsing through the largest coin inventory utilizing the latest **computer technology.**

Soon, an initial group of coin dealers located throughout the country, will be provided access to the **UNITRADE state of the art computer network.** This core group of dealers will grow to a national network of thousands by the end of 1992.

These dealers will be able to view <u>instantaneously</u>,from a **UNITRADE** provided computer terminal in their offices the current "real time" prices of thousands of coins in the **UNITRADE's multi-million dollar inventory.** These dealers will be able at "the touch of a button" to buy for you any coin listed on this huge inventory.

Also, these dealers will be able to easily and efficiently enter <u>for you</u> a coin or coins that you want to sell, and within a matter of minutes a description of that coin and your asking price will be communicated via satellite to hundreds of dealers across the country and will automatically become part of the **UNITRADE** inventory. Thousands of dealers, collectors and investors will have the opportunity to buy your coins.

Although, **UNITRADE**'s initial offer is to provide a **huge coin inventory,** this concept will quickly expand to other **collectibles:** baseball cards, stamps, diamonds and gems, etc.

The countdown has begun. In a few short weeks, **UNITRADE associates** will be ready to assist you with your coin needs.

[illegible] However no [illegible] It will be bag [illegible]

MS-63 CHOICE UNCIRCULATED: Will have [illegible] bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS 64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS 65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS 65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS 63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS 63 but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 - but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

ASKS & SELLS DOMINATE EFFORTS

Early Mint Sets On The Rise

The Market in Depth

Dealers across America are asking themselves if the rally which began in late November is over, or just taking a deep breath. After three months of rising Bids, the market climb decelerated into stability just in time for the ANA/PNG Early Spring Convention in Dallas. That show was marked by relatively slow action, but few dealers were lowering their Asking prices. No sooner did the dealers get back home, though, than the discounted selling began.

Even so, the appearance of several hundred Asks at levels below the previous week's Bid was not sufficient to indicate an overall market reversal. There were still plenty of constant Bids last week, and frankly, more than a few plus signs as well. In fact, there were enough plus signs to still show a positive increase in the **Certified Coin Market Index** which we update weekly in the ***Bluesheet***. Certain parts of last week's market, such as DMPL Morgan Dollars, could actually be described as ***strong***.

This week, activity in the marketplace is again dominated by lowered Asks, or as we often call them when they fall below the previous week's Bids, ***discounted sells***. We never predict market direction, but we can state with some assurance that consistent offering of coins below the previous week's Bids is going to drive the market down. In the marvelous world of supply and demand, coins are "*worth*" either what you can sell them for or what your offering price is – depending on your cash flow situation. If enough dealers are willing to sell for lower levels, that is what the coins will be "*worth*". This week we have a major jump in the total number of posted Asks, so the Asks are definitely broadcasting the future direction of the market – and while the news is not good, it's not all that bad either.

The good news in the marketplace is that the coins are selling – yes, at lower levels, but not at *radically* lower levels. If the overall market adjusts downward a few points, no one will panic as long as coins are moving and the drops are not precipitous. In a collectibles market, the winner really is the guy who ends up with the most nice coins. **Remember, one man's discounted sell is another man's buying opportunity.**

There remains plenty of spectacular material in the market. Bowers and Merena's upcoming Marvin P. Matlock, M.D. Collection (March 21 & 22 in New York) contains a fabulous assortment of rarities. Collectors will find much of interest among the gold coins, with many early branch mint $20s, nearly a dozen 1793 Large Cents, a Proof-65 1856 Flying Eagle Cent, and some exceptional colonials.

This Week's Market

CENTS THRU HALVES: Most of the trading activity in the BU roll market continues to be at current Bid levels (actual trades are not all that plentiful). Even so, the majority of changes this week are to the downside. To most dealers, it seems like the rolls they want to get rid of are usually not on dealer want lists.

DOLLARS: The Dollar market has lost some of its steam from the last several weeks. There are many more discounted sells in the MS-64 & 65 columns this past week as marketmakers lower their Bids and potential sellers attempt to decrease their inventories. However, the MS-63 column seems to be holding up fairly well. A further look into the DMPL columns indicates that several issues are seeking lower levels due to higher populations, lower Bids, and discounted sells.

PROOF SETS AND MINT SETS: Proof and Mint Sets have been very busy this past week. Almost every set in the charts is in demand at current levels, or, at the new higher levels. The most active are the Mint Sets from 1948 to 1958.

COMMEMORATIVES: The Commem market (both Silver and Gold issues) is also experiencing numerous declines. Several dealers have reported that availability is on the increase; along with the fact that demand is very specific for certain issues, some dealers are not in the market for the more common issues. This wait-and-see attitude could make for opportunistic purchases on the part of astute buyers.

TYPE: The Type market continues to falter as the number of minus signs has increased immensely over the last several days. The high Bidders are conspicuous by their absence and potential sellers are reporting that they are trying to unload coins before prices fall further.

GOLD: This week's U.S. Gold chart appears to be slightly more stable than that from last week. There is an even balance of plus and minus signs in Mint State issues and the declines are very minute. Most of the trading activity has been taking place at current levels.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$391/$403, 1987 1oz-$392/$411, 1/2oz-$195/$205, 1988 1oz-$480/$505, 1/2oz-$193/$223, 1989 1oz-$480/$515, 1/2oz-$210/$245, 1990 1oz-$585/$625, 1/2oz-$350/$385. Proof Silver Eagles are trading at: 1986-$16/$18, 1987-$16.50/$18.50, 1988-$78/$86, 1989-$15.75/$18.50, 1990-$24.75/$27. BU 1986 Silver Eagles wholesale at $12.25/$13.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc., may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems) will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-60 (CHOICE [illegible] UNCIRCULATED) Will have [illegible] bag marks that show only a slight weakness [illegible] have full lustre. These are well [illegible]

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same chara[illegible] as the MS-63 but with the additional [illegible] mirror proof-like surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 - but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

COLLECTOR ACTIVITY STIMULATES MARKET

Rare Saint Realizes Over $500,000

The Market in Depth

Last week's **CDN** reported a significant downturn in the overall market. The majority of the charts disclosed numerous minus signs as many dealers were offering coins at noticeably lower levels. The discounts were not enormous reversals, however, they were indicative of a market turnaround. Nonetheless, this week dealers are reporting that the overall market has mostly stabilized at these new levels. Do not mistake this to mean that there are no minuses in the charts; there are declines in various areas due to lower sells in conjunction with the lower Bids.

Show activity this past weekend was reported as on the rise. The bulk of dealers remained busy enough to conceal their complaints (if they had any). So this week the market appears steady despite the negative feedback from last week. Dealers continue to possess a penchant for creating activity when there seems to be no business at hand. With this new-found positive perspective, the market may be able to adjust much faster than in the past. This, of course, means that a market can reverse itself rather quickly.

Coin Shows also report that interest in collector material has been increasing; even some of the dealers who normally shy away from the collector are trying to fill want lists for the very same collectors who they may have ignored in the past. While looking through some of the charts this week, you may notice that the collector-oriented issues in MS-63 Dollars are the ones showing an increase in price. Barber coinage is also getting a lot of play from the collector market.

The increased collector activity was also evidenced at the last Stack's sale which realized nearly $4 million. This sale contained everything from Type to Gold to Twentieth Century rarities (a considerable amount of dated material); and a nice showing by Paper Money. Probably the most significant coin in the sale was the 1927-D $20 Saint-Gaudens, which was graded as Choice BU. It realized $522,500 after very competitive bidding from the floor.

This Week's Market

CENTS THRU HALVES: While the majority of Bid changes are to the downside this week, it is important to realize that the balance of the charts are moderately steady. Bidders are looking for specific dates at current levels and in some cases are willing to take several of each issue. Where minus signs are shown, potential sellers are trying to shift rolls out of their inventories.

DOLLARS: Despite the occasional minus signs in the MS-63, 64 & 65 Dollar charts, the overall picture appears to be one of a balanced market. In fact, there are enough plus signs to indicate that dealers are trying to fill want lists at expanded levels. There are several dealers who are making very concerted efforts to obtain better-date issues even if it costs more to do so.

PROOF SETS AND MINT SETS: A long list of plus signs can be seen in the Proof Set chart. Just when it appeared like this area was about to be discounted across the chart, it has come back very strong. Even the Mint Set chart has its share of pluses, mostly in the early years (1947 to 1958).

COMMEMORATIVES: Silver Commems are showing some added strength this week after the downturn of the last couple of weeks. Where there are no visible changes, the market is steady at these levels. Gold Commems continue to drop off slightly.

TYPE: While the Type market is still demonstrating some weakness, there are enough plus signs to contribute an air of confidence in the upcoming weeks. There seems to be a very simple concept at work here: Some dealers are trying to raise money by selling at discounts, while others are trying to fill want lists by purchasing other issues at higher levels.

GOLD: The U.S. Gold chart reveals that this is one area where weakness seems to be the rule this week. There are numerous minus signs in the Mint State columns and there are few plus signs. On the other hand, most of the unchanged issues are in demand at these levels, or very close.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$391/$401, 1987 1oz-$392/$410, 1/2oz-$195/$202, 1988 1oz-$480/$500, 1/2oz-$193/$223, 1989 1oz-$485/$515, 1/2oz-$225/$260, 1990 1oz-$585/$625, 1/2oz-$350/$395. Proof Silver Eagles are trading at: 1986-$16.50/$18, 1987-$16.50/$18.75, 1988-$78/$85, 1989-$15.75/$17.50, 1990-$25/$27. BU 1986 Silver Eagles wholesale at $12.50/$13.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 · Unc., may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 · Choice BU · Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 · Distinct BU · Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 · Gem BU · Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY.

MS-60 [illegible] A [illegible] Strictly Uncirculated [illegible] However [illegible] are necessary [illegible] will be bag [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtualIly clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for 'typical' coins. These usually average MS-63+ but may also include some MS-6[illegible] and MS-65 exa[illegible]s. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for Roll sets in this chart are for typical original rolls of each date and mint mark

UNITRADE INC

IS COMING TO A DEALER NEAR YOU!

SHORTLY, ONE OF THE BOLDEST CONCEPTS EVER FOR THE COLLECTIBLE INDUSTRY WILL BE FULLY UNVEILED. A SINGLE WORD HAS BEEN COINED TO DESCRIBE THIS TREMENDOUS UNDERTAKING...

UNITRADE

The name **UNITRADE** will describe the primary source where you can buy or sell coins (through a **UNITRADE** associate) at current competitive market prices simply by browsing through the largest coin inventory utilizing the latest computer technology.

Soon, an initial group of coin dealers located throughout the country, will be provided access to the **UNITRADE state of the art computer network.** This core group of dealers will grow to a national network of thousands by the end of 1992.

These dealers will be able to view **instantaneously**,from a **UNITRADE** provided computer terminal, in their offices, the current "real time" prices of thousands of coins in the **UNITRADE's multi-million dollar inventory.** These dealers will be able at "the touch of a button" to buy for you any coin listed on this huge inventory.

Also, these dealers will be able to easily and efficiently enter **for you** a coin or coins that you want to sell, and within a matter of minutes a description of that coin and your asking price will be communicated via satellite to hundreds of dealers across the country and will automatically become part of the **UNITRADE** inventory. Thousands of dealers, collectors and investors will have the opportunity to buy your coin(s).

A special feature of **UNITRADE** will be the world's first "real-time, computerized auction" using computers and satellites.

The **UNITRADE** auction will be patterned after actual, current coin auctions. Utilizing the **UNITRADE** computer in his office, an associate on his own behalf or for a client, will be able to bid on any coin, or item, in the computer auction, as if he is present in person on the auction floor.

Although, **UNITRADE's** initial offer is to provide a **huge coin inventory,** this concept will quickly expand to other **collectibles**: baseball cards, stamps, diamonds and gems, etc.

The count down has begun. In a few short weeks, **UNITRADE** associates will be ready to assist you with your coin needs.

MARKET SOMETIMES UP; MARKET SOMETIMES DOWN

Sometimes Market Up & Down

The Market in Depth

While uncertainty over market direction continues to pervade the marketplace, at least this week's uncertainty didn't stand in the way of some healthy advances. The number of minus signs is minor, and most of those represent rather insignificant declines. Overall, the market is steady or rising slightly. So, it looks like the doom-and-gloomers who have been predicting a major Depression in coin prices will just have to wait (hopefully, forever).

We recognize that coin prices will never be stable, as long as the forces of supply and demand operate relatively freely. The question that remains, however, is whether this relatively quick response to the lower levels of the last several weeks was generated by buying pressure from dealers or their customers. Either is a distinct possibility. One thing is certain, if you are in the market for either buying or selling coins this week, you are going to have at least two factors to consider: 1)Current Bid, and 2) Your own prediction on which way the market is headed. Even if we allowed ourselves to make predictions, we would stay clear of this one.

We are sure about one aspect of the current numismatic market—auctions continue to draw the attention of serious buyers. Bowers & Merena's recently concluded Marvin P. Matlock Collection realized over $2.6 million, with over 200 registered floor bidders. Enthusiastic bidding was reported, and broad-based demand is one of the truly positive signals we look for in a rising market.

This Week's Market

CENTS THRU HALVES: The BU roll market is maintaining the same characteristics week after week. Half the market is steady at current levels, while the other half is either ignored completely or discounted. The perception then becomes that the roll market is down because of the appearance of minus signs in the chart. This is not necessarily the case as at least half of the issues listed are not trading at current levels, yet would trade at these levels or higher if offered.

DOLLARS: Just when you think the Dollar series is about to tumble to lower levels, something spurs activity and dealers begin posting higher Bids again. This past week has seen a significant increase in Bidding activity for MS-63, 64 & 65 issues; most dates remained steady while numerous issues climbed higher. There were very few minuses this week.

PROOF SETS AND MINT SETS: The majority of Proof Sets continue to attract a large number of Bidders at current levels. However, a few of the silver sets (1958-1963) are lower; the 1990 no "S" Proof Sets have also declined. Mint Sets are generally stable with most activity occurring at today's levels.

COMMEMORATIVES: The majority of changes found this week in the Silver Commem chart are to the upside. Where changes have not been made, the issues are prevalently active at current Bids. A number of Gold Commems have fallen this week, but the bulk of these issues are steady.

TYPE: The Type charts are still showing more minus than plus signs; however, the urgency of declines over the last few weeks has subsided somewhat. Enough plus signs have appeared so that a ray of hope emerges on the horizon.

GOLD: The U.S. Gold chart continues to expose more frailties in this area of numismatics. One of the reasons for this may be that most gold issues are some of the easiest coins to transact of any series. At the same time, **on an average**, they are higher value than in other areas, so sellers have the potential to raise capital very quickly.

EAGLES: American Proof Gold Eagles are trading among dealers at: 1986 1oz-$385/$397, 1987 1oz-$387/$405, 1/2oz-$195/$210, 1988 1oz-$460/$500, 1/2oz-$190/$220, 1989 1oz-$470/$525, 1/2oz-$220/$260, 1990 1oz-$570/$615, 1/2oz-$340/$385. Proof Silver Eagles trade at: 1986-$17/$18.50, 1987-$17/$18.75, 1988-$80/$86, 1989-$15.75/$17.25, 1990-$25.50/$28. BU 1986 Silver Eagles wholesale at $13/$13.50.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc.-may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example but shows no wear or damage.

MS-63 Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems) will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 Distinct BU - Far and away nicer than MS-63 yet a near miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike with eye-appeal. Attractive toning permissible.

MS-65 Gem BU - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-60 (UNCIRCULATED) [illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike, [illegible] have full lustre. These are well above average [illegible].

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

MARKET ADJUSTMENTS MIXED

Dollars and Commems Stable

The Market in Depth

This week's coin market again dares us to put a label on it, and careful analysis provides just about the same answer as a quick look: The market is mixed, with some prices up, some down, and the bulk steady. The overall trend of the market since last December has definitely been upward; the slight mini-dip and mini-recoveries of the past month are beginning to look like a consolidation phase.

Most dealers continue to expect the market to rise further, although they can point to no specific news events or underlying pressures that should make it do so. On the other hand, the dealers who are bearish on the coin market equally cannot point to any specific news events or underlying pressures that should make the market decline. If we are indeed witnessing a supply/demand marketplace that is in equilibrium, then future movement will depend upon two possibilities: A change in the supply of coins, or a change in the demand for coins.

Either of these possibilities is only partially quantifiable, and even then depends upon the subjective observations of many dealers. A $20 million auction would certainly be an observable event, but auctions remain only a part of the overall supply picture; walking the floor at Long Beach or ANA can only give you an incomplete picture of dealer inventory levels. And if supply is difficult to quantify, pity the economist who tries to measure demand in the coin business. Again, auctions come to mind as a way of getting a quick fix on the market, but how to measure the demand spread across several thousand coin shops nationwide?

This week, we saw a multitude of Bidders at current levels on Dollars and Commems (naturally, anyone following the market will recognize that we are referring to silver Commems). We view these two series as being among those most popular with collectors, and thus we would expect the demand for such popular series to be strong across the country. However, we also consider Mint Type to be extremely popular, and this week Type coins were under some selling pressure. It seems unlikely that collectors across America suddenly decided to forsake Type coins in favor of Morgans, and yet, long-term, that is the message that such movements convey.

This Week's Market

CENTS THRU HALVES: Nearly every week the BU roll market finds a substantial number of discounted rolls. This week is no different as numerous declines can be seen in the Roosevelt Dime chart. Occasional sellers are found in other series which also results in lower levels. The Washington Quarter series is being neglected in the early years (prior to 1956), although the common dates (silver issues) are in demand.
DOLLARS: Morgan Dollars are very actively sought at current levels. Many dealers are in the market for properly graded coins which will fit into their customer's sets. Even the most common issues seem to be moving at today's levels. The 1893-O Morgan, in MS-65, rose considerably this week. One was purchased at the recent Stack's sale for just over $50,000; it then traded at over $100,000 this past week (It has now been certified as an MS-65 by PCGS).
PROOF SETS AND MINT SETS: The Proof Set chart may not reveal a lot of increases, however, almost every issue is in strong demand at current Bid levels. Mint Sets are nearly as active at today's Bids, but not quite across the whole chart.
COMMEMORATIVES: While there are not a lot of changes in the Commem charts this week, if you are attempting to trade in this area, you will find that buyers are quite interested in most issues at current levels. Most dealers are trying to stay within current Bids without raising them. At the same time, there are only a few occasional sellers near the Bid levels.
TYPE: The Mint State Type market is looking very puny. The number of active buyers has dwindled of late and even those who may be interested in certain areas, seem to be curious only if the price is heavily discounted.
GOLD: The U.S. Gold market continues to find more issues declining than rising. The decreased Bid levels are a combination of both a lowering of Bids by dealers and further discounting of various issues. Some dealers feel that a few issues are becoming very attractive at these new levels.
EAGLES: American Proof Gold Eagles are wholesaling at: 1986 1oz-$385/$398, 1987 1oz-$387/$405, 1/2oz-$193/$218, 1988 1oz-$450/$500, 1/2oz-$190/$220, 1989 1oz-$465/$530, 1/2oz-$215/$260, 1990 1oz-$555/$620, 1/2oz-$330/$385. Proof Silver Eagles are trading at: 1986-$16/$18, 1987-$17/$18, 1988-$79/$85, 1989-$16/$17, 1990-$25/$26.50. BU 1986 Silver Eagles wholesale at $13/$13.65.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT-UNSEEN** market; such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc.,may not have full mint lustre may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage

MS-63 Choice BU - Brilliant Unc (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65 Few contact marks in field, only minor marks on main devices. Full strike, with eye appeal. Attractive toning permissible

MS-65 - Gem BU -Sharp, full strike NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

COMMEMORATIVES

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC please refer to *the Certified Coin Dealer newsletter*

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins These usually average MS-63 but may also include some MS-60 and MS-65 examples For strictly graded MS-65 single sets use prices for individual issues as listed in the Monthly Summary Prices for BU sets are for typical original rolls of each date and mint mark

MARKET DRIVEN LOWER BY DISCOUNTED SELLS

Proof & Mint Sets In Demand

The Market in Depth

Bids are minusing across many charts as dealers are consummating trades at levels below last week's market. Even more significant, according to those dealers who have been predicting a major market reversal, are the number of lowered Asks visible on the teletype services—offers to sell material below last week's market with no immediate takers. Is the market headed for "new lows", as some have been speculating?

It might be useful to look at the areas where the market is strong. The brightest lights this week are Proof & Mint Sets, the low-priced, "bread and butter" items of so many coin shops. Proof Sets are quite strong at higher levels, and Mint Sets are showing strength at current levels. This is material sold in thousands of shops to tens of thousands of collectors, offering them nice-looking material at an affordable price.

The national coin market, for all its progress in recent years, still suffers from one major inefficiency. Nationwide, hobby-wide, there is no uniform reporting mechanism for **demand**. Abstractly, "demand" is a compendium of the value/pricing mechanisms at work in every coin shop, and through every numismatist, in America. Pragmatically, however, we know that the demand that we report is often colored by the Bids & Asks that are available and visible (usually from the larger dealers). For decades, their actions at auctions, on the bourse floors and teletype systems have "created" the news that we report. But we also know that there are thousands of dealers making a living selling nice coins to nice people, who don't participate 'visibly'. Is their demand also lower? Or is the dog being wagged by the tail?

In a rapidly rising market, the "bigger" dealers (whose larger checkbooks help fuel the fire) broadcast their demand, which we report accordingly. No dealer thinks twice about this, because every coin rises along with the highest visible Bid. The question of efficiency only arises when Bids are declining, and discounted offers to sell begin to appear. Are the thousands of smaller dealers willing to accept the "fact" that coins are worth less? Or are they only taking advantage of lower levels? Either way, in the numismatic market (as in so many areas of investment life), the perception of reality becomes reality. If everyone believes a coin is worth $4,000, then it is worth $4,000; if everyone believes that it is now worth $3,000, then you have a minus sign and a declining market.

This Week's Market

CENTS THRU HALVES: Although the BU roll market continues to exhibit stability for a majority of the issues within each series (these are the issues with no changes), the visible fluctuations each week indicate downward movement. This week finds War Nickels falling to lower levels, along with common Mercury Dime rolls. Several dates within the Roosevelt series are also declining. Various Walker rolls are slightly lower as they adjust to the decrease in price of "graded" common singles.

DOLLARS: MS-63 Dollars are stable at today's Bid levels, however, the same cannot be said for the MS-64 & 65 markets. There are numerous minus signs throughout the columns due to much discounting by dealers. Many dealers have reported that they are trying to sell coins before they drop further. On the other hand, for those collectors who need specific coins, this may be a good time to buy selected issues.

PROOF SETS AND MINT SETS: Proof Sets are about the hottest part of the market. Plus signs dominate the chart as dealers try to outbid each other. Mint Sets remain very much in demand at current Bid levels. These are two areas of the market which are being dealt in by every coin shop in the country.

COMMEMORATIVES: This week finds the Commem market in a very unstable situation. While it was true that there had been plenty of buyers for most issues over the last several weeks at the prevailing Bids, this week there is an immense turnaround. Every change listed in the Commem columns designated by a minus sign is the result of discounted sells or lower Ask prices. Obviously, where minuses occur, Bidding support has vanished for these specific issues.

TYPE: The Type market continues on a downhill slide. The majority of changes are declines as many dealers are willing to discount their inventories. In fact, nearly all of the drops are due to lowered sells by dealers.

GOLD: The U.S. Gold chart indicates a general lowering of Bid and Ask levels. Unlike other series, you can raise large sums of cash very fast in the Gold series. When a dealer needs to raise capital, he will turn to Gold coins. The market can and will react very quickly to Gold coins; a turnaround can happen in a blink.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$387/$399, 1987 1oz-$389/$408, 1/2oz-$192/$220, 1988 1oz-$460/$485, 1/2oz-$190/$220, 1989 1oz-$460/$500, 1/2oz-$208/$255, 1990 1oz-$585/$600, 1/2oz-$350/$390. Proof Silver Eagles are wholesaling at: 1986-$16/$18.50, 1987-$16.50/$19.50, 1988-$78/$84, 1989-$15.75/$19, 1990-$24/$28. BU 1986 Silver Eagles wholesale at $13/$13.75.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT UNSEEN** market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer to-Dealer transactions, as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc.,may not have full mint lustre, may be dull, toned or spotted. May be the worst possible example but shows no wear or damage

MS-63 - Choice BU Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins

MS-64 - Distinct BU -Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible

MS-65 - Gem BU -Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPER8) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

COLLECTOR COINS BRIGHTEN MARKETPLACE

Activity Mostly Steady at Today's Levels

The Market in Depth

It's becoming easier to spot the 'popular' coins – they're the ones that are holding their price levels. Asks below prior market levels are continuing to drive many Bids lower, as dealers continue to seek new market levels to sustain trading activity. Sometimes, we think about the demand side of the supply/demand balance as a cool, mostly rational process. We were recently reminded that demand can sometimes be fanned into the bright flames of desire.

Rarely does the fact that we cannot own coins create a problem, but anyone who has examined the Amazing Collection of United States Silver Dollars to be auctioned May 26-28 by Superior Galleries will understand this dilemma. Simply stated, these are coins that **make you want to own them!** Proponents of strike will point to the exceptional quality of the pieces; the aesthetic collectors will look at the multi-hues of superb toning; students of history will look at the collection and consciously feel the pull of other places and times. Just 18 pieces, but this would be a world-class collection even if many of the pieces weren't the finest known.

We especially like the inclusion of the 1732 Pillar Dollar; all too often these important parts of our numismatic heritage are forgotten. And what would a collection of American Dollars be without a 1776 Continental Dollar in Pewter (and one in MS65 to boot!). The new owner of the **finest known** Proof Bust Dollar with Heraldic Eagle will have claim to owning one of the finest collections in America.

Unless of course, the 1794 Flowing Hair Silver Dollar Presentation Piece is purchased by a different Bidder – in that case, they will both have claims to owning one of the finest collections in America. 1794 Flowing Hair Dollars are rare enough; in MS65 they are more than rare enough; but ***to own the Presentation Specimen*** – with a strong possibility that this is the Coiner's Proof! Numismatic dreams are made of such coins as these.

At any given time there are many thousands of coins available in the marketplace, and usually thousands of outstanding quality. The number of coins we would like to own is countless. We accept that, and have learned to live with it. It is still amazing what emotions can be inspired by just **eighteen coins.**

This Week's Market

CENTS THRU HALVES: This week finds the BU roll market quite steady. The bulk of the Bidding activity is being done at previous Bids so the net result is a stable appearing marketplace. Most of the Bids seemed to be in the Franklin series with additional activity in the Washington series.

DOLLARS: The Dollar market has firmed up this week as potential buyers have increased a number of their Bids (MS-63, 64 & 65). There are a few occasional minus signs due to lower sells as these issues appear to be more readily available than other issues. The common issues are persistent at current Bids as trading has a thin spread.

PROOF SETS AND MINT SETS: Proof Sets remain hot. Nearly every issue from 1957 forward to 1990 has buyers at today's Bid levels. Just a few issues have plus signs after last week's barrage. Mint Sets are also steady at current levels with most dealers still trying to purchase sets at Bids.

COMMEMORATIVES: Commems remain a little soft this week as dealers are predominantly sellers rather than buyers at current levels. The lower grades seem to be stronger at their Bids than the MS-64 & 65 issues. The hardest hit area was MS-64 Gold. Sellers are willing to discount almost every issue in order to deplete their inventories.

TYPE: Type coins have a fairly healthy mix of plus and minus signs this week, although the minuses still predominate the charts. Furthermore, the issues with no changes are steady at these levels. The overall picture indicates that the downward trend of the last few weeks has diminished considerably.

GOLD: The U.S. Gold chart has finally turned around this week. The majority of changes in the Mint State columns are to the upside as dealers feel that Bids were moving too low. Circ Gold is lower, but this is in sympathy to the stagnant bullion price.

EAGLES: American Proof Gold Eagles are trading at: 1986 1oz-$386/$399, 1987 1oz-$388/$408, 1/2oz-$192/$217, 1988 1oz-$440/$480, 1/2oz-$188/$220, 1989 1oz-$445/$485, 1/2oz-$205/$250, 1990 1oz-$515/$590, 1/2oz-$340/$385. Proof Silver Eagles are wholesaling at: 1986-$17/$18.50, 1987-$16.50/$18.25, 1988-$78/$86, 1989-$15.75/$16.75, 1990-$24.50/$28. BU 1986 Silver Eagles trade at $12.75/$13.65.

The weekly COIN DEALER Newsletter (*Greysheet*) reports the national, Dealer-to-Dealer, wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight seen. The coins may be certified or "Raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Bids reported also consider activity in the certified **SIGHT UNSEEN** market, such bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. Unlike the CCDN where bids fluctuate strictly according to dealer buys, the CDN may not change Bids just because a dealer lowers his Bids, but will be strongly influenced by sells which are lower than current Bid/Ask levels. **INVESTORS NOTE:** The prices in the Newsletter are from Dealer-to-Dealer transactions; as an investor you may buy and sell coins through a dealer for a fee.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 Unc., may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example but shows no wear or damage.

MS-63 Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark – these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices – particularly the pre-1941 issues. Washington rolls – dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUMMARY

[illegible]

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. *Must have eye appeal.*

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtuallly clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. *Must have eye appeal!*

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces on both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects Prices of such seldom encountered specimens are based upon the merits of each coin They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins These usually average MS 63 - but may also include some MS 60 and MS 65 examples For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark
